Why Azure AD P2 (PIM)?

Video type: Nugget

Video category: Level-300

Session Agenda

 @HannesLagler

 <https://cloudblogger.at>

- The license model of Azure AD
- What is PIM?
- Why and for whom PIM?
- LIVE DEMO

The license model of Azure AD

- There are different license models available
 - Free
 - Office365 Apps (E1, E3, E5, F5)
 - P1
 - P2
- Each license includes a different feature.
- Azure AD is also included in License bundles like
 - EMS, M365

What is PIM?

- Is a service to manage, control, and monitor access
- Provide **just-in-time** privileged access to Azure AD and Azure resources
- Assign **time-bound** access to resources using start and end dates
- Enforce multi-factor authentication to activate any role
- Get notifications when privileged roles are activated

Why and for whom PIM?

 @HannesLagler

 <https://cloudblogger.at>

- 
- Implement JIT Access and least privilege
 - Reduce the people who have access to secure information
 - Implement an approval process
 - For everyone ore high privileged users
 - Requires Azure AD P1 license

Switch to the Live Demo!

A hand is shown holding a sign that says "APPLAUSE". The background is a colorful, abstract pattern of circles.

- 
- A stylized key icon with a blue and white digital pattern, set against a dark blue background with a hexagonal shape.
- Overview about Azure PIM
 - Options for Azure AD roles and Azure resources
 - Request Azure AD roles / groups
 - Request Azure resources
